MemHT Portal 3.6.0

10/01/2008 18:47 by mem

The final 3.6.0 version is arrived.

Finally MemHT Portal, known as CMS, offers a valid solution for Bloggers: This release contains a full blog addon with posts, comments, categories, archive etc.

The other big news is the new installer and the (almost) universal updater engine, indeed MemHT Portal is no more released in two version (Full and Update).

The installer will permit to configure MemHT Portal from the beginning: CMS or Blog. Those two configurations differ only in the initial installed template, addons and blocks. Note: Independently of the choise, all features will be available and the portal will be 100% customizable, there aren't substantial differences.

The updater wizard will permit to update all versions (at least 2.9) to the last released one (3.6.0 in this case) very easily
