## MemHT Portal 3.6.5

27/01/2008 23:37 by mem

The biggest news in this release is the new template engine (RainTPL).

It uses pure html files, very easy to use. Of course PHP is still usable within the template files, so they are still 100% customizable.

Old template are no more compatible, but the conversion is very simple (usually not more than 10 minutes per template, no PHP knowledge is required).

I hope you'll enjoy it.
