MemHT Portal 3.8.5

23/06/2008 14:17 by mem

As always you have not to wait too much for new releases.

I'm proud to release this version not because of new incredible features, but because is the first one on which have worked other developers too. I want to thank all people for helping me: Paulo, Docwyatt, Kierownik and DubMatrix.

Let's talk about the new version now: these are some of the news, check the release changes page for more info:

- Added multiple recipient to private messages. Write usernames, separating them by commas, example: jack,sara,pablo.
- Sticky blocks with different (highlighted) styles (obviously old templates will not highlight blocks until they are updated).
- Customizable users profile structure.
- Enhanced user search page in admin > users etc.
